I also know that Seth's CSS output 402.6 for the next round of StRAPs specifically mentions climate change: "identification of chemicals in environmental media after catastrophic events". So maybe that would be an area that one of these individual projects from the AltEn work could be included.

I've been thinking about ties to EJ already. Fence-line community. A close relative of NIMBY—not in my back yard. This could certainly help with shifting from finding problems to solving them!

Subject: Thoughts about AltEn Project

Hey, Elin and Tony,

I just had some thoughts about a way we might be able to "pitch" the project in a way that it might be "easier" to be approved.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

I'm not sure if any of these ideas would be able to be used, but if they could be, I'm not sure exactly how to tailor the proposals to fit these areas. That's why I included Tony in this email, because I know the Above-ground Storage Tank project you're involved in directly mentions the climate change and environmental justice aspect of things. Maybe you'd have some input as to if this is even a route that we could take, and if so, how would be the best way to approach it.

Just wanted to send you two these thoughts on this and see if they might be helpful or not.

Take care and talk to you later,

Sloop
